

Eiman John Espedido

Cybersecurity Analyst

+63 945-869-5898 · eimanj.espedido@gmail.com

SUMMARY

Computer Engineering graduate with hands-on experience in Security Operations Center (SOC) monitoring, threat detection, and secure software development. Experienced in analyzing security alerts, supporting incident investigation, and building production applications using Flutter, Firebase, and cloud technologies. Strong foundation in networking, web technologies, and application security with a passion for blue team operations, incident response, and cybersecurity.

SKILLS

Languages	Frameworks	Backend & Cloud	Tools	Cybersecurity
Dart, Java, Python	Flutter, FlutterFlow, HTML, CSS, React	Firebase, Firestore, Google Cloud	Git, GitHub, Visual Studio Code	Security Monitoring, Threat Detection, Incident Response, Vulnerability Assessment

PROJECTS

De La Salle Lipa

Python • Raspberry Pi •
React • JavaScript •
Machine Learning

FitFighter – AI-Based Fitness Punching Game

- Developed an interactive boxing-based fitness game combining hardware sensors and software to encourage physical activity through gamification
- Implemented punch-detection using impact sensors with LED feedback, tracking metrics such as punch speed, reaction time, and session performance
- Designed an adaptive difficulty system using machine learning concepts to adjust gameplay based on user performance and fitness progress

WORK EXPERIENCE

DysrupIT

06/2025 – 07/2025

Security Operations Center Intern

- Monitored system alerts and logs within a SOC environment to identify potential security incidents
- Assisted in analyzing alerts and supporting basic incident investigation workflows
- Participated in security exercises involving web vulnerabilities, threat detection, and monitoring tools
- Contributed feedback on internal system structure and UI improvements for operational tools

LikhaInternet Inc.

11/2023 – 7/2026

Part Time Junior Software Developer

- Developed and maintained production web applications using Flutter and FlutterFlow for operational systems used by water districts
- Implemented frontend features and backend data handling using Firebase and Firestore for reliable real-time data management
- Improved UI layouts and workflows to enhance usability for internal staff and clients
- Troubleshoot and resolved application issues while collaborating with senior developers to deliver new features

EDUCATION

De La Salle Lipa

Aug 2022 - Jun 2026

Bachelor of Science in Computer Engineering

Activities:

HexCore Labs Capture the Flag - Runner Up (Oct 2025)

Captain – DLSL Badminton Stallions (2022–2024)

Volunteer – ACES Community Development Projects (2024–2025)

WebDev Associate - ACES (2025 - 2026)
